

Invitation to attend the
Rat Genome & Models Meeting

– 1 & 2nd of December, 2006 –

Melbourne

The international *Rat Genome & Models* meeting will be held in Melbourne later this year. This meeting has a proud tradition of high quality presentations of cutting-edge research in the area of rat genomics and its broad application to human diseases.

To make the meeting even more productive for attendees, it has been decided to 'overlap' the meeting with the *Australian Health & Medical Research Congress* (<http://www.ahmrcongress.org.au/>). You can of course attend the *Rat Genome* meeting only, but please note that we have organized a special registration deal if you also wish to attend the *AHMRC* meeting.

IMPORTANT!

Get on the mailing list NOW!

At this stage, we would like you to tell us as soon as possible if you are likely to attend the *Rat Genome* meeting. This will allow us to both plan accordingly, as well as place you on the mailing list thereby keeping you informed about further developments. Thus, to express your interest in attending and make sure that you receive future updates, simply e-mail me **BEFORE THE 7th August** with your name and address at the following;

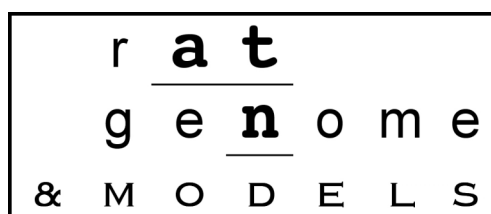

robertdn@unimelb.edu.au

The website for the *Rat Genome* meeting is at:

<http://www.ahmrcongress.org.au/rat%20genome%20workshop.htm>

Thanks and looking forward to seeing you in Melbourne. I guarantee you the very highest quality science (and site-seeing!).
